Art Unit: 1774

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 9-16, drawn to a method of making a yarn, classified in class 264, subclass 172.1+.
- II. Claims 17-21, drawn to a product having a dpf, classified in class 428, subclass 395.
- III. Claims 22-27, drawn to a product having a dpf and fatigue strength retention, classified in class 428, subclass 364.

The inventions are distinct, each from the other because:

Inventions Group I and Group III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed as claimed can be made by a materially different method such as spinning, extruding, solidifying, quenching, drawing twisting, and dip coating.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Margaret Millikin on April 26, 2004 and April 27, 2004 however, there was no response.
